

COVID-19 INFORMATION AND ACTION PLAN

Preventative Measures

Wear face masks indoors and also outdoors when you cannot physically distance

Don't attend gatherings if you feel unwell, and keep your distance (1.5 metres) from people not in your group

Get a double dose of vaccination, plus a booster when available

Test for COVID if you are symptomatic.

If you are a close contact to a positive case, register with SA Health to receive a Rapid Antigen Test (RAT).

Close Contacts

In South Australia a close contact is:

- a household member or intimate partner
- someone who has had close personal interaction with a COVID-19 case during their infectious period
- a person who has been notified by SA Health that they are a close contact with a COVID-19 case
- a person who has been at an exposure site during the exposure period for that site.

SA Health advises that Close Personal Interactions are defined as interactions:

• lasting 15 minutes or longer

• where masks are not worn

• in close proximity

• occurring indoors.
